### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Applicant recites an integrated conveyor system having a plurality of vehicles and a series of track modules. The track modules are comprised of a pair of rails and also comprised of powered and unpowered modules, where the powered modules utilize a powered conveyor belt between the rails to power the vehicles along the rails. The belts are operated at various speeds to allow for an acceleration section where the belt will move at a faster speed in order to accelerate the vehicles through a section and a decelerating belt that moves at a slower speed to essentially brake the vehicles and slow or stop them along various sections. The vehicles are also equipped with front and rear stop members. The stop members allow for vehicles to be lined up safely and without damage as they leave a powered section. Once they are lined up the belt can then power a line of vehicles by moving vehicles later in the sequence.

The prior art made of record, taken singularly or in combination, does not adequately disclose the features of the instant invention.

Specifically, the prior art of Heinold et al (US 4,946,023) discloses an overhead conveyor system with a powered conveyor for moving vehicles. However, Heinold et al does not disclose stop means on the front or rear of the vehicle for creating a line of vehicles to be moved by the powered conveyor. The prior art of Heinold et al also does not disclose multiple conveyor belts operating at different speeds to accelerate and brake the vehicles.

The prior art of Carlton et al (US 5,669,309) discloses an accumulating conveyor system for moving a plurality of vehicles along a track. However, the vehicles of Carlton et al are not equipped with stop means on the front and rear nor does Carlton et al disclose the use of conveyor belts or conveyor belts moving at various speeds.

The prior art of Fishaw et al (US 6,705,454) discloses an accumulating conveyor system, however, Fishaw only shows stop means at various points on the tracks and not on the vehicles. Fishaw et al also shows powered modules with conveyor belts and unpowered modules without conveyor belts but does not disclose any of the belts moving at various speeds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT J. MCCARRY JR whose telephone number is (571)272-6683. The examiner can normally be reached on Monday through Friday 7:00am to 3:00pm.
